

Even Universities / Colleges Have Exam Fever

And we have diagnosed the problem, viz. there is simply no scope for error. The stakes are too high - for the student, as well as the college. One error is all it takes to undo the entire reputation of a College built painstakingly over years.

The Solution: [Click Exam](#) from Theorem Technology an ERP based IT package that treats the problem by nullifying any possibility of error, anytime, anywhere, anyplace, and wherever, whichever and whatever the Exam processes.

Conducting Examinations is more than distributing Question Papers and collecting Answer Papers from the students! For College Managements and the Resource Persons involved, the mercury level goes up right from data crunching from Admin, allotment of class time table, allotment of Exam Registration Number, Batches for Practicals, and so on and so forth leading up to a complex web of Invigilation, Evaluation, and Result Reports.

Why lose sleep over the imponderables and improbables and give scope to human error dealing a fatal blow - to the Management as well as the Student, not to forget the Teachers, and Parents.

Let your Breaking News be spot-on, zero-error, examination scheduling and implementation, rather than bad press on account of Murphy's Law, viz. 'When something can go wrong, it will'.

[Click Exam](#) covers the entire gamut of Examination processes, through its separate Modules for Examination Section, Evaluation Section, Result Section & Reports. From the time the gong is sounded for the pre-exam process all the way down to the post-result functions, [Click Exam](#) will keep you stress-free, and free of any exam fever.
