

“50% of expenses in running a hostel go down the drain*.”

* Plus 100% headache

Ok, it's an Anonymous quote, but indisputable.

Unreliable data. Useless records. Unexplainable bills. Unwanted overheads. Unavailable facts. That's the universal experience of hostels in the educational sector, anywhere, anyplace, anytime.

In theory, it need not be so. And so we at Theorem Technology perfected a theory of practice to develop a **Hostel Management System(HMS)** that instantly puts back every rupee lost to where it belongs and adds more bang to your buck.

With our **Hostel Management System(HMS)** in place, you can close the gates on glitches in admissions, mess-ups at the mess, bunking and proxy attendance, and monitor payments, issue receipts, make salaries, crunch numbers, take reports, MIS, forms, reduce downtime, plug leakages in revenue and expenses, increase marginal revenue, add to the bottom line, and get a snap shot of whether your Hostel is making or losing money, if so, why, what measures need to be taken, what changes to be made where, when and how, etc - at the click of a mouse.

HMS: The New Best Friend of School/College/Educational Institutions/NGOs/Companies/Government and Private Sector Organizations.

HMS: To improve the efficiency multi-fold of Wardens, Mess Managers, Facilities Manager, Administrative & Accounts Personnel, Case Workers, and Management.

The HMS is - Biometric Enabled, Multi-User, and SMS Enabled. So you can plug in and play (and not like before, plug in and pay!)

Our USP (Unique Selling Proposition):

- Biometric enabled fool-proof system;
- SMS-enabled services deliver information across all stakeholders so that everyone is connected and empowered to take informed decisions;
- Reports are generated instantly through a user-friendly menu-driven package, and the system is process-driven eliminating any need for human intervention.
- Mess bill and other bill calculations at a single click
- Payment tracking of individual student.
- Zero-error in figures and reporting

HMS Package offers separate modules for Administration (covering admissions, room allocation, and related data); Mess Module (including registration, attendance and payments receivable, etc) and Reports Module for course-wise, category-wise, student-wise reports.

HMS: Aligning Educational Managements, Faculty, Employees, Students, and Parents, for mutual gain.
